MYK LATICRETE - Stainfree, Cementitious and Epoxy Grouts

Technically, it is a urethane or an acrylic-silicone resin grout. It shares many of the benefits of epoxy grout: it has excellent color consistency, doesn't need to be sealed, resistant to breakage and chemicals, resists mold and mildew, is stain resistant, and doesn't effloresce. Once exposed to the air, it begins to set up.

Which Grout is Best for My Tile? | Daltile

Epoxy grout – the best grout for natural stone tiles Epoxy grout is strong, form impermeable seams and is resistant to staining. It could well be said that this is the best grout for natural stone. However, all the benefits have a price tag: epoxy grout is the most expensive type of grout for natural stone.

Urethan grout may not be your best choice of grout for natural stone as it may cause discoloration over time. It is also not a great choice for fireplace surrounds or steam showers because the heat will soften the grout lines – no fun! Epoxy. Epoxy grout is the more common performance grout in the US (Urethane is more common in Europe).

The Right Tile Grout for Your Tile Project | Seriously ...

Epoxy grouts provide incredible water and chemical resistance, strength, and color retention. They provide a superior bond which can be stronger than the tile itself. Epoxy grouts maintain their color through years and years of use and often return to their original color after cleaning.
