Vertebrate Endocrinology represents more than just a treatment of the endocrine system-it integrates hormones with other chemical bioregulatory agents not classically included with the endocrine system.

Vertebrate Endocrinology - 4th Edition

Vertebrate Endocrinology represents more than just a treatment of the endocrine system-it integrates hormones with other chemical bioregulatory agents not classically included with the endocrine system.

General and Comparative Endocrinology - Journal - Elsevier

Endocrinology is a branch of medicine dealing with disorders of the endocrine system and its specific secretions called hormones.Hormones are molecules that act as signals from one type of cells to another. Most hormones reach their targets via the blood. Although every organ system secretes and responds to hormones (including the brain, lungs, heart, intestine, skin, and the kidney), the ...
