### **Guide to the Vascular Plants of the Florida Panhandle ...**

What are vascular plants? These are types of plants that have roots, stems and leaves , which are fed thanks to a vascular system that is responsible for distributing water and nutrients so that they can develop and grow. This system is formed by the xylem, which distributes the crude sap from the roots to the leaves, and the phloem, which is responsible for transporting the sap from the leaves to the rest of the plant.
