How to Adjust High-DPI Scaling in Windows 10 | Digital Trends

Divide the total rise by the typical rise per step. This will give you the total number of steps on your stairs. The typical rise per step is about 6.5-8 inches (17-20 cm), but you'll probably use a slightly different height for the actual rise. For example, if your total rise is 95 inches (240 cm), divide it by 7 inches (18 cm) to get 13.53.

How to Build High-Performing, Self-Managed Teams | by ...

Lead the journey in rigorous and employee-centric ways: Too often, a call for culture change only moves from the top of an organization down through the ranks. Instead, take an “employee-back” view when designing change efforts. We frequently see culture treated as a side project, without the rigor commensurate with a major business initiative.
