The wireless revolution began in the 1990s, with the advent of digital wireless networks leading to a social revolution, and a paradigm shift from wired to wireless technology, including the proliferation of commercial wireless technologies such as cell phones, mobile telephony, pagers, wireless computer networks, cellular networks, the wireless Internet, and laptop and handheld computers with wireless connections.

Introduction to Wireless Networking | Tutorial-Reports.com

Wireless Communication is the fastest growing and most vibrant technological areas in the communication field. Wireless Communication is a method of transmitting information from one point to other, without using any connection like wires, cables or any physical medium.

Introduction to wireless networks -- from 'The book of ...

Enterprise wireless LANs use a WLC (Wireless LAN Controller) and LWAPs (Light-Weight Access Point). Management tasks like creating wireless networks, authentication and roaming is all done in the WLC. The LWAPs are responsible of forwarding wireless traffic to and from the LAN. The WLC and LWAPs allow us to create a big, scalable wireless network.
