### MX Series MIC Overview - TechLibrary - Juniper Networks

Juniper M series is a line of multiservice edge routers designed and manufactured by Juniper Networks, for enterprise and service provider networks. It spans over M7i, M10i, M40e, M120, and M320 platforms with 5 Gbit/s up to 160 Gbit/s of full-duplex throughput. The M40 router was the first product by Juniper Networks, which was released in 1998. The M-series routers run on JUNOS Operating System.

### Juniper M series - Wikipedia

The MX10008 and MX10016 can be deployed to build out edge architecture for converged mobility, IoT, businesses, and cable environments. They can also be used in converged core architectures, optimizing the label-switching router (LSR), provider edge, Internet peering, and backbone applications for national or regional deployments.
