This transference is ambivalent: it comprises positive (affectionate) as well as negative (hostile) attitudes towards the analyst, who as a rule is put in the place of one or other of the patient's parents, his father or mother. (Sigmund Freud: An Outline of Psychoanalysis - 1940.)

Psychoanalysis - Transference - Sigmund Freud

Freud's technical papers, "The Dynamics of Transference" in particular, established most of the basis for a century of clinical psychoanalytic work. A contemporary reading of that paper illustrates both the power of the original presentation and how far we have come.

Transference, Counter-Transference and Co-transference

Freud stated that at the transference love itself often occurs "precisely at the point of time when one is having to try to bring her (the patient) to admit or remember some particularly distressing and heavily repressed part of her life-history".
