Principles Pharmacology Tropical Approach Okpako

The author presents a concise treatment of systematic pharmacology, discussing the cultural and environmental factors that affect the use of drugs in the tropics. The book highlights the potential inconsistencies and incompatibilities that arise from the use of traditional and orthodox medicine, which can account for the extensive misuse of modern drugs among populations where the two systems are practiced.

Principles Pharmacology Tropical Approach Okpako Cambridge

Pharmacokinetics. Ion trapping is the reason why basic (alkaline) drugs are secreted into the stomach (for example morphine), where pH is acidic, and acidic drugs are excreted in urine where the conditions are alkaline.Similarly, ingesting sodium bicarbonate with amphetamine, a weak base, causes better absorption of amphetamine (in stomach) and its lesser excretion (in urine), thus prolonging ...

Ion trapping - Wikipedia

Progestogens, also sometimes written progestagens or gestagens, are a class of steroid hormones that bind to and activate the progesterone receptor (PR). Progesterone is the major and most important progestogen in the body. The progestogens are named for their function in maintaining pregnancy (i.e., progestational), although they are also present at other phases of the estrous and menstrual ...
